ACADEMIC REGULATIONS & CURRICULUM

Applicable to the students admitted from the Academic Year 2024-25 Onwards

Computer Science and Information Technology B. Tech. Program

MAHARAJ VIJAYARAM GAJAPATHI RAJ COLLEGE OF ENGINEERING (Autonomous)

(Approved by AICTE, New Delhi, and permanently affiliated to JNTUGV, Vizianagaram, Listed u/s 2(f) & 12(B) of UGC Act 1956) Vijayaram Nagar Campus, Chintalavalasa, Vizianagaram-535005, Andhra Pradesh. The visionaries

Late Dr. P V G Raju Raja Saheb of Vizianagaram Founder Chairman-MANSAS Ex-Minister for Education and Health, Govt. of AP Ex Member of Parliament

Late Dr. P. Anand Gajapathi Raju Ex-Chairman-MANSAS

Ex-Minister for Education and Health Govt. of AP. Ex-Member of Parliament.

P. Ashok Gajapathi Raju Chairman-MANSAS Ex-Union Minister for Civil Aviation, Govt. of India. Ex-Minister for Finance, Govt. of AP

Academic Regulations (R24M) for B. Tech (Regular-Full time)

(Effective for the students admitted into I year from the Academic Year 2024-25 onwards)

1. Award of the Degree

Award of the B.Tech. Degree if he/she fulfils the following:

- Pursues a course of study for not less than four academic years and not more than eight academic years. However, for the students availing Gap year facility this period shall be extended by two years at the most and these two years would in addition to the maximum period permitted for graduation (Eight years).
- (ii) Registers for **160** credits and secures all **160** credits.

2. Award of B.Tech. degree with Honors

- 1. A student will be declared eligible for the award of the B.Tech degree with Honors if he/she fulfills the following:
 - Student secures additional 16 credits fulfilling all the requisites of B.Tech program i.e., 176 credits.
 - (ii) Registering for Honors is optional.
 - (iii) Honors is to be completed simultaneously with B.Tech. program.
- 2. Students, who fail to fulfill all the academic requirements for the award of the degree within eight academic years from the year of their admission, forfeit their seat in B.Tech. course and their admission stands cancelled.

This clause shall be read along with clause 1 (a) (i).

3. Admissions

Admission to the B. Tech Program shall be made subject to the eligibility, qualifications and specialization prescribed by the A.P. State Government/University from time to time. Admissions shall be made either based on the merit rank obtained by the student in the common entrance examination conducted by the A.P. Government/University or any other order approved by the A.P. Government/University, subject to reservations as prescribed by the Government/University from time to time.

4. Program related terms

Credit: A unit by which the course work is measured. It determines the number of hours of instruction required per week. One credit is equivalent to one clock hour of teaching (Lecture/Tutorial) or two clock hours of practical work/field work per week.

Credit definition:

1 Hr. Lecture (L) per week	1 credit
1 Hr. Tutorial (T) per week	1 credit
1 Hr. Practical (P) per week	0.5 credit
2 Hrs. Practical (Lab) per week	1 credit

- a) **Academic Year**: Two consecutive (one odd + one even) semesters constitute one academic year.
- b) **Choice Based Credit System (***CBCS***):** The CBCS provides a choice for students to select from the prescribed courses.

5. Semester/Credits:

- i. A semester comprises 90 working days and an academic year is divided into two semesters.
- ii. The summer break term is for eight weeks during which a student has the opportunity to pursue Internship/ apprenticeship/work-based vocational education and training. This is intended to meet the mandatory requirement of a student to carry out 2-credit Community Project and Mini Project modules. This is especially helpful for students who wish to exit after two semesters or four semesters of study.
- iii. Regular courses may also be offered during the summer on a fast-track mode to enable students to do additional courses or complete backlogs in coursework. The student will have the option to repeat the course inclusive of continuous assessment.
- iv. The institution can decide on the courses to be offered in the summer term depending on the availability of faculty and the number of students.

6. Structure of the Undergraduate Program:

All courses offered for the undergraduate program (B.Tech.) are broadly classified as follows:

S. No.	Category	Breakup of Credits (Total 160)	Percentage of total credits
1.	Engineering Major	81	50.625
2.	Extended Open Elective Cluster (EOEC)	29	18.125
3.	Generic Engineering Stream	20	12.5
4.	Ability Enhancement Courses (AEC)	6	3.75
5.	Value Added Courses (VAC)	6	3.75
6.	Skill Enhancement Courses (SEC)	8	5
7.	Projects	10	6.25
	Total	160	100

7. Course Classification:

All subjects/courses offered for the undergraduate program in Engineering & Technology (B.Tech. degree programs) are broadly classified as follows:

Course Category		
Professional Core	 16 Professional Core Theory Mandatory of 3 credits each 5 Professional Core Elective Theory of 3 credits each 5 * 3 credits = 15 credits 6 Professional Core Lab of 2 credits each 6 * 2 credits = 12 credits 	
	 Projects (Mini & Major)(2 + 8) credits = 10 credits Department specific module (SEC) = 2 credits 	87
Basic Sciences	 M-I and M-II 2 * 3 credits = 6 credits Physics + Lab (3 + 1) credits = 4 credits Chemistry + Lab (3 + 1)credits = 4 credits Department Specific Math oriented courses 2 * 3 credits = 6 credits 	20
Humanities	 AEC (Language Proficiency = 2 credits; Env. Studies = 2 credits; Community Project = 2 credits) VAC (E & HV = 2 credits; Constitutional values/ Rights = 2 credits; Health & Wellness = 2 credits) SEC (Quantitative Problem Solving = 2 credits) 	14
Engineering Sciences/Professional Sciences	 EOEC-Extended Open Elective Cluster 6 Theory Mandatory modules. 6 * 3 credits = 18 credits 1 Theory Elective module. 1 * 3 credits = 3 credits 4 Lab/practice modules. 4 * 2 credits = 8 credits,	39
		160
Honors	Optional For Honors (In Professional Core Area as a deep dive into Professional Elective Cluster) 4 Modules * 4 credits = 16 credits	16
	4 Year Honors Degree	176

8. Programme Pattern

- i. Total duration of the B. Tech (Regular) Program is four academic years of 8 semesters.
- ii. A semester comprises 90 working days and an academic year is divided into two semesters.
- iii. There will be an Induction Program before the commencement of the First Semester for the newly admitted students in order to provide orientation and acclimatization to the college campus and professional learning environment. Several activities such as physical activity, creative arts, universal human values, literary, proficiency modules, lectures by eminent people, visits to local areas, familiarization to the departments, innovation activities etc., form part of the Induction Program.
- v. Value Added Courses (VAC) like Health & Wellness, Constitutional Rights/Values, Ethics and Human Values are mandatory credit courses for all the undergraduate students.
- vi. Ability Enhancement Courses (AEC) like Language Proficiency, Environmental Studies and Community Project are mandatory credit courses for all the undergraduate students.
- vii. Skill Enhancement Courses (SEC) like Office Tools & Social Media Etiquette, Engineering Workshop, Quantitative Problem Solving Techniques and Departmental Specific Module are mandatory credit courses for all the undergraduate students.
- viii. Undergraduate degree with Honors is offered as an option for the students having good academic record.
- xvi. College shall assign a faculty advisor/mentor after admission to a group of students from same department to provide guidance in courses registration/ career growth / placements / opportunities for higher studies/ GATE/ other competitive exams etc.

9. Evaluation Process

- The performance of a student in each semester shall be evaluated subject wise with a maximum of 100 marks for 3 credit theory subjects, 50 Marks for 2 credit theory courses and 100 marks for practical subjects. Community Project and Mini Project shall be evaluated for 50 marks while Main Project work shall be evaluated for 200 marks.
- A student has to secure not less than 35% of marks in the semester end examination and a minimum of 40% of marks in the sum total of the Continuous Assessment (CA) and Summative Assessment (SA) marks taken together for the theory, practical, design, drawing subject or project etc.

THEORY COUSES

Assessment Method	Marks
Continuous Assessment (CA)	40
Summative Assessment (SA)	60
Total	100

- i. For theory subject, the distribution shall be 40 marks for Continuous Assessment and 60 marks for the Summative Assessment.
- ii. For practical subject, the distribution shall be 40 marks for Continuous Assessment and 60 marks for the Summative Assessment.

a) Continuous Assessment (5- unit/3 Credit courses)

- i. Continuous Assessment, which is evaluated for 40 Marks is divided into 2 parts: Periodic Assessment (PA) examinations for 25 Marks and Teacher Assessment (TA) for 15 Marks. There shall be two Periodic Assessment (PA) examinations each of 25 marks during a semester. The weighted average in 80/20 ratio will be taken for 25 marks. The duration of exam is 90 minutes. The PA question paper contains 3 long answer questions with internal choice. Each Long answer question carries 7 marks. (3 * 7M = 21 marks). This will be scaled up to 25 marks)
- ii. The first PA examination shall be conducted on Units I & II with either/or type question from each unit and the second PA examination shall be conducted on Units III, IV and V with either/or type question from each unit.
- iii. The Teacher Assessment (TA) for 15 marks shall be based on assignments/projects/presentations /surprise tests/quizzes which the concerned course owner/subject teacher shall design. The TA methodology shall be approved upfront by the Board of Studies and the same shall be informed to the students at the beginning of the semester itself.

The weighted average in 80/20 ratio is calculated in the following manner. For example:

Marks obtained in first PA exam: 25 Marks obtained in second PA exam: 20 Final PA Marks: (25x0.8) + (20x0.2) = 24

If the student is absent for any one PA examination, the final PA semester marks shall be arrived at by considering 80% weightage to the marks secured by the student in the appeared examination and zero to the other. For example:

Marks obtained in first PA: Absent Marks obtained in second PA: 25 Final PA Marks: (25x0.8) + (0x0.2) = 20

Final Continuous Assessment marks shall be evaluated as follows: CA = Final PA + TA

b) Summative Assessment - Evaluation Pattern for 5-Unit/3-Credit courses

Summative Assessment examination of 3-credit theory subjects shall have the following pattern:

- > The SA will be conducted for 60 Marks (**180 minutes**)
- Question Paper contains two parts: Part A is for 50 Marks and Part – B is for 10 Marks.
- In Part A, there shall be one question from each of the 5 units (with either/or choice) which will be evaluated for 10 marks each
- In Part B, there will be 1 question of 10 marks (with either/or choice) that may be a case study or comprehensive examination treating the course as one complete whole.

c) Continuous Assessment (5-unit/2 Credit courses)

For a 2-credit theory course, Continuous Assessment is evaluated for 20 Marks and shall only include the Periodic Assessment (PA) examination. There will be no Teacher Assessment component for these courses. There shall be two PA examinations each of 20 marks. The weighted average in 80/20 ratio will be taken for 20 marks. The duration of exam is **90 minutes**. The PA question paper contains 3 long answer questions with internal choice. Each Long answer question carries 6 marks. (3 * 6M = 18 marks. This will be scaled up to 20 marks)

d) Summative Assessment – Evaluation Pattern for 5-Unit/2-Credit courses

Summative Assessment examination of 2-credit theory courses shall have the following pattern:

- > The Examination will be conducted for 30 Marks (5 * 6 Marks).
- Question Paper contains 5 questions (with either/or choice), one from each unit.
- > The duration of exam is for **120 minutes**.

PRACTICAL COURSES

Assessment Method	Marks
Continuous Assessment (CA)	40
Summative Assessment (SA)	60
Total	100

- a) For practical subjects, there shall be a Continuous Assessment during the semester for 40 marks and Summative Assessment for 60 marks.
- b) The CA shall include 2 components: Day-to-day work evaluated for 25 marks and Pre-Summative Assessment examination evaluated for 15 marks. Day-to-day work in the laboratory shall be evaluated by the concerned laboratory teacher based on the regularity/record/viva and the Pre-Summative Assessment Examination shall be conducted before the end of the semester.
- c) The SA shall be evaluated for 60 marks, conducted by the concerned laboratory teacher and a senior expert in the subject from the same domain.
- d) The Summative Assessment laboratory examination shall be conducted for **120 minutes** and assessment includes:

- Knowledge on Principles/concepts/Procedure: 20 Marks
- Experimental design /work, Results-Interpretation and analysis: 30 marks
- Viva voce: 10 marks.

e) Computer Aided Engineering Drawing – Evaluation Pattern

Assessment Method	Marks
Continuous Assessment (CA)	40
Summative Assessment (SA)	60
Total	100

- a) The CA shall include 2 components: Day-to-day work evaluated for 25 marks and Pre-Summative Assessment examination evaluated for 15 marks. Day-to-day work shall be evaluated by the concerned subject teacher based on the reports/submissions prepared in the class. The Pre-Summative Assessment examination pattern shall consist of 3 questions (either/or type) of 5 marks each.
- b) The Summative Assessment examination shall be evaluated for 60 marks, conducted by the concerned teacher and a senior expert in the subject from the same domain.
- c) The question paper shall contain 3 questions (with either/or choice). Each question will be of 20 marks (5 marks for free hand drawing and list of commands and 15 marks for final drawing prepared in AutoCAD). A student shall answer all questions.

f) Computer Aided Geometric Design and Assembly Lab – $\ensuremath{\mathrm{Evaluation}}$ Pattern

Assessment Method	Marks
Continuous Assessment (CA)	40
Summative Assessment (SA)	60
Total	100

- a) The CA shall include 2 components: Day-to-day work evaluated for 25 marks and Pre-Summative Assessment examination evaluated for 15 marks. Day-to-day work shall be evaluated by the concerned subject teacher based on class reports and submissions. The pre-summative examination question paper consists of two questions: one on modeling & drafting and one on assembly & drafting. Each question carries 5 marks. Student must answer both questions. And the remaining 5 marks are allocated for viva-voce.
- b) The SA examination shall be evaluated for 60 marks, conducted by the concerned teacher and a senior expert in the subject from the same or related department.
- c) The SA examination question paper consists of two questions: one on modeling & drafting and one on assembly & drafting. Each question carries 25 marks (divided into 5 marks for free hand drawing & procedure and 20 marks for final drawings (modeling/assembly/drafting). Student must answer both questions and the remaining 10 marks are allocated for viva-voce.

10. Massive Open Online Courses (MOOCs):

In order to promote the spirit of blended learning, a student is eligible to pursue a maximum of 20% of the credits through MOOCs. A student shall register for the course (minimum of 8 weeks for a 2-credit course, 12 weeks for a 3-credit course and 16 weeks for a 4-credit course as in Honors) offered as self-study through MOOCs with the approval of Chairman, Board of Studies of the concerned Program. The Head of the Department shall appoint one mentor to monitor the students' progression. The student needs to earn a certificate by passing the exam. The student shall be awarded the credits assigned in the curriculum only by submission of the certificate. Examination fee, if any, will be borne by the student.

Students who have qualified in the proctored examinations conducted through MOOCs platform can apply for credit equivalence as specified and are exempted from appearing for the CA and EA examinations (for the specified equivalent credit course only) conducted by the institution.

Necessary amendments in rules and regulations regarding adoption of MOOC courses would be proposed from time to time.

11. Academic Bank of Credits (ABC)

The Institution is part of the Academic Bank of Credits (ABC) initiative to promote increased opportunity of mobility for a student (as per NEP 2020). As such,

- i. A student, upon joining the institution, will become part of the ABC.
- ii. All credits earned by the students in the institution as well as through MOOCs will be reflected in his/her account in the ABC
- iii. The student will be able to avail transfer of credits earned from other institutions to his account as per the regulations of UGC/AICTE/JNTUGV declared from time to time.

12. Summer Internships

There will be a summer break of 8 weeks at the end of each academic year to provide opportunity to students to engage in internships with industry/government agencies/NGO etc. These internships are intended to give exposure to the students through Community Projects and Mini Projects. The Community Project shall be carried out during the summer break after Year 2 and the Mini Project shall be carried out during the summer break after Year 3. The Community Project shall be society oriented and shall be completed in collaboration with government organizations/NGOs & others. The other internship at the end of third year is Industry Internship and shall be completed in collaboration with Industries.

Evaluation of the Community Project and Mini Project shall be through the departmental committee. A student will be required to submit a report to the concerned department and appear for an oral presentation before the departmental committee comprising of Head of the Department, supervisor of the project and a senior faculty member of the department.

A certificate of successful completion of internship from industry/NGO may be included in the report. The report and the oral presentation shall be evaluated for 50 marks as a Summative Assessment. There shall be no Continuous Assessment marks for these projects. A student shall secure minimum 40% of marks for successful completion. In case, if a student fails, he/she shall reappear as and when semester supplementary examinations are conducted by the Institution.

Main Project Work:

The 4th Year of study comprises only self-study courses giving opportunity to students to spend one full year as an intern at various organisations (government/private) in pursuance of his/her career aspiration. The student is also expected to complete the Main Project during this period. At the end of the year, the candidate shall submit the main project report and may also include a certificate of internship.

The project report shall be evaluated with an external examiner. The total marks for project work is **200 marks** and the distribution shall be **80 marks** for continuous assessment and **120 marks** for summative assessment. The supervisor assesses the student for 40 marks (Report: 20 marks, Seminar: 20 marks). At the end of the semester, all projects shall be showcased at the department for the benefit of all students and staff and the same is to be evaluated by the departmental Project Review Committee consisting of supervisor, a senior faculty and HOD for 40 marks. The external evaluation of Project Work is a Viva-Voce Examination conducted in the presence of internal examiner and external examiner and is evaluated for 120 marks.

The college shall facilitate and monitor the student main project/internship programs. Completion of the main project is mandatory. If any student fails to complete the main project, he/she will not be eligible for the award of degree. In such cases, the student shall repeat and complete the main project.

14. Guidelines for offering Honors

The objective of introducing B.Tech.(Honors) is to facilitate the students to choose additionally the specialized courses of their choice and build their competence in a specialized area in the UG level. The program is a best choice for academically excellent students having good academic record and interest towards higher studies and research.

- i. Honors is introduced in the curriculum of all B. Tech. programs offering a major degree and is applicable to all B.Tech (Regular and Lateral Entry) students admitted in Engineering & Technology.
- ii. A student shall earn additional 16 credits for award of B.Tech.(Honors) degree from same branch/department/discipline registered for major degree. This is in addition to the credits essential for obtaining the Undergraduate degree in Major Discipline.
- iii. A student is permitted to register for Honors and is allowed to take maximum of two subjects per semester pertaining to the Honors.

- iv. Separate class work and timetable of the courses offered under Honors program shall be arranged.
- v. Courses that are used to fulfill the student's primary major may not be double counted towards the Honors. Courses with content substantially equivalent to courses in the student's primary Major may not be counted towards the Honors.
- vi. Students can complete the courses offered under Honors either in the college or in online platforms like SWAYAM with a minimum duration of 16 weeks for a 4-credit course satisfying the criteria for credit mobility. If the courses under Honors are offered in conventional mode, then the teaching and evaluation procedure shall be similar to regular B. Tech courses.
- vii. A student registered for Honors shall pass in all subjects that constitute the requirement for the Honors degree program. No class/division (i.e., second class, first class and distinction, etc.) shall be awarded for Honors degree program.
- viii. If a student drops or is terminated from the Honors program, the additional credits so far earned cannot be converted into open or core electives; they will remain extra. However, such students will receive a separate grade sheet mentioning the additional courses completed by them.
- ix. The Honors will be mentioned in the degree certificate as Bachelor of Technology (Honors) in XYZ. For example, B.Tech. (Honors) in Mechanical Engineering.

15. Enrolment into Honors:

- i. Students of a Department/Discipline are eligible to opt for Honors program offered by the same Department/Discipline.
- ii. The enrolment of student into Honors is based on the CGPA obtained in the major degree program. CGPA shall be taken up to VI semester in case of regular and Lateral entry students. Students having 7 CGPA without any backlog subjects will be permitted to register for Honors.
- iii. Transfer of credits from Honors to regular B. Tech degree and vice-versa shall not be permitted.
- iv. Honors is to be completed simultaneously with a Major degree program.

16. Registration for Honors:

- i. The eligible and interested students shall apply through the HOD of his/her parent department. The whole process should be completed within one week before the start of every semester. Selected students shall be permitted to register the courses under Honors.
- ii. The selected students shall submit their willingness to the principal through his/her parent department offering Honors. The parent department shall maintain the record of student pursuing the Honors.

- iii. The students enrolled in the Honors courses will be monitored continuously. An advisor/mentor from parent department shall be assigned to a group of students to monitor the progress.
- iv. There is no fee for registration of subjects for Honors program offered in offline at the respective institutions.

17. Attendance Requirements:

- i. A student shall be eligible to appear for the external examinations if he/she acquires a minimum 75% of attendance in aggregate of all the subjects.
- ii. Condonation of shortage of attendance in aggregate up to 10% (65% and above and below 75%) in each semester may be granted.
- iii. Students whose shortage of attendance is not condoned in any semester are not eligible to take their end examination of that class and their registration shall stand cancelled.
- iv. A student will not be promoted to the next semester unless he satisfies the attendance requirements of the present semester. They may seek readmission for that semester from the date of commencement of class work.
- v. If the learning is carried out in blended mode (both offline & online), then the total attendance of the student shall be calculated considering the offline and online attendance of the student.
- vi. Given the extensive scope for learning in blended mode, a student can seek consideration of time spent online or on course projects in lieu of attendance. The college academic committee will arbiter engagement of students on a case-to-case basis where a student falls short of the requisite attendance.
- vii. For induction program attendance shall be maintained as per AICTE norms.
- **18. Promotion Rules:** The following academic requirements must be satisfied in addition to the attendance requirements.
 - i. A student shall be promoted from first year to second year if he/she fulfills the minimum attendance requirement as per university norms.
 - ii. A student will be promoted from II to III year if he/she fulfills the academic requirement of securing 40% of the credits (any decimal fraction should be rounded off to lower digit) in the subjects that have been studied up to either III semester or IV semester from the following examinations irrespective of whether the candidate takes the examination or not.
 - iii. A student shall be promoted from III year to IV year if he/she fulfills the academic requirements of securing 40% of the credits (any decimal fraction should be rounded off to lower digit) in the subjects that have been studied up to either V semester or VI semester from the following examinations irrespective of whether the candidate takes the examination or not.

- iv. And in case, a student is detained for want of credits for a particular academic year by ii) & iii) above, the student may make up the credits through supplementary examinations and only after securing the required credits he/she shall be permitted to join in the III year (V sem) or IV year (VII sem) respectively as the case may be.
- v. When a student is detained due to lack of credits/shortage of attendance he/she may be re-admitted when the semester is offered after fulfillment of academic regulations. In such case, he/she shall be in the academic regulations into which he/she is readmitted.

19. Grading:

As a measure of the student's performance, a 10-point Absolute Grading System using the following Letter Grades and corresponding percentage of marks shall be followed:

After each course is evaluated for 100 marks, the marks obtained in each course will be converted to a corresponding letter grade as given below, depending on the range in which the marks obtained by the student fall.

Range in which the marks in the subject fall	Grade letter	Grade points
≥ 90	A+ (Outstanding)	10
≥ 80 and < 90	A (Excellent)	9
≥ 70 and < 80	B (Very Good)	8
≥ 60 and < 70	C (Good)	7
≥ 50 and < 60	D (Average)	6
≥ 40 and < 50	E (Pass)	5
< 40	F (Fail)	0
Absent	Ab (Absent)	0

Structure of Grading of Academic Performance

A student obtaining Grade "F" or Grade "Ab" in a subject shall be considered failed and will be required to reappear for that subject when it is offered the next supplementary examination.

Computation of Semester Grade Point Average (SGPA) and Cumulative Grade Point Average (CGPA):

The Semester Grade Point Average (SGPA) is the ratio of sum of the product of the number of credits with the grade points scored by a student in all the courses taken by a student and the sum of the number of credits of all the courses undergone by a student, i.e.,

SGPA = Σ (C_i × G_i)/ Σ C_i

where, C_i is the number of credits of the ith subject and G_i is the grade point scored by the student in the ith course.

The Cumulative Grade Point Average (CGPA) will be computed in the same manner considering all the courses undergone by a student over all the semesters of a program, i.e.,

 $CGPA = \Sigma (C_i \times S_i) / \Sigma C_i$

where "Si" is the SGPA of the ith semester and C_{i} is the total number of credits up to that semester.

Both SGPA and CGPA shall be rounded off to 2 decimal points and reported in the transcripts.

While computing the SGPA the subjects in which the student is awarded Zero grade points will also be included.

Grade Point: It is a numerical weight allotted to each letter grade on a 10-point scale.

Letter Grade: It is an index of the performance of students in a said course. Grades are denoted by the letters A^+ , A, B, C, D and F.

Award of Class:

After a student has satisfied the requirements prescribed for the completion of the program and is eligible for the award of B. Tech. Degree, he/she shall be placed in one of the following four classes:

Class Awarded	CGPA Secured
First Class with Distinction	≥ 7.0 (Without any supplementary appearance)
First Class	≥ 6.0 and < 7.0
Second Class	\geq 5.0 and < 6.0
Pass Class	\geq 4.0 and < 5.0

Note: Students who have written supplementary examinations to fulfil the credit requirement will not be awarded First Class with Distinction. For such students the highest degree that is awarded will be First Class Only.

CGPA to Percentage conversion Formula = CGPA x 10

20. With-holding of Results

If the candidate has any dues not paid to the institution or if any case of indiscipline or malpractice is pending against him/her, the result of the candidate shall be withheld in such cases.

21. Multiple Entry / Exit Option

With NEP setting in, the theme is we will need to give different entry-exit options for students and a possibility to tailor a 4-year course or even a 3-year exit degree to suit their interests and requirements.

- Exit-Entry at each year of study through the entire 4-year duration.
- Possible multiple Degree Options with different Credit requirements that provide an option to a student to pick an option that best suits his/her interests and requirements.

• Note: Four Year undergraduate program (FYUP) with or without Honors is the most recommended exit. But if for some unavoidable reasons, a student needs to exit at the end of Year I, Year II, Year III, the following would be the respective exit requirements with a tentative certificate/ diploma/ degree defined.

Year of Exit	Degree	Credits Required to be Earned During Course Work	Exit Extra Credits (Crash Course & Exam)	Total Credits
End of Year I	Office Tools Certificate (Or something equivalent as determined by Affiliating University)	40	6	46
End of Year II	Diploma in Discipline 1 (Or something equivalent as determined by Affiliating University)	88	8	96
	Bachelor in Vocational Sciences in Discipline1 (Or something equivalent as determined by Affiliating University)		0	136
Year IV	Bachelor of Technology in Discipline 1) (Or something equivalent as determined by Affiliating University)		0	160

Year of Exit	Degree	Credits Required to be Earned During Course Work		Total Credits
	Bachelor of Technology with Honors in Discipline 1)	176	0	176
	(Or something equivalent as determined by Affiliating University)			

Note: The exit extra credits at Year II and Year III would essentially come from critical courses as determined by BoS from the following semester.

(a) Exit Policy:

The students can choose to exit the four-year program at the end of first/second/third year.

i) **UG Certificate in (Field of study/discipline)** - Program duration:

First Year (first two semesters) of the undergraduate program, 40 credits followed by an additional exit 6 credit bridge course. The 6 extra credits would be to make the certificate self-sufficient, with one 3-Credit Course on Taxation and one 3-Credit Course on Accounting that would help the candidates acquire job-ready competencies required to enter the workforce.

- ii) UG Diploma (in Field of study/discipline) Program duration: First two years (first four semesters) of the undergraduate program, 88 credits followed by an additional exit of 8-credit bridge course with 2 Integrated 4 Credit courses in Major with 3+1 Theory and Lab distribution administrated as a Crash course in 1 month which would help the candidates acquire job-ready competencies required to enter the workforce.
- Bachelor of Science (in Field of study/discipline) i.e., B.Sc. Engineering in (Field of study/discipline)- Program duration: First three years (first six semesters) of the undergraduate program, 120 credits.

(b) Entry Policy:

Modalities on multiple-entry by the student into the B.Tech. program will be provided in due course of time.

Note: The institution shall resolve any issues that may arise in the implementation of Multiple Entry and Exit policies from time to time and shall review the policies in the light of periodic changes brought by UGC, AICTE, State government and the affiliating university.

22. Transitory Regulations

Discontinued, detained or failed candidates are eligible for readmission as and when the semester is offered after fulfillment of academic regulations. Candidates who have been detained for want of attendance or not fulfilled academic requirements or who have failed after having undergone the course in earlier regulations or have discontinued and wish to continue the course are eligible for admission into the unfinished semester from the date of commencement of class work with the same or equivalent subjects as and when subjects are offered, subject to Section 2 and they will follow the academic regulations into which they are readmitted.

Candidates who are permitted to avail Gap Year shall be eligible for rejoining into the succeeding year of their B.Tech from the date of commencement of class work, subject to Section 2 and they will follow the academic regulations into which they are readmitted.

23. Medium of Instruction:

The medium of instruction of the entire B.Tech undergraduate program in Engineering &Technology (including examinations and project reports) will be in English only.

24. Student Transfers:

Student transfers shall be as per the guidelines issued by the Government of Andhra Pradesh and the University from time to time.

25. General Instructions:

- a. The academic regulations should be read as a whole for purpose of any interpretation.
- b. Malpractices rules-nature and punishments are appended.
- c. Where the words "he", "him", "his", occur in the regulations, they also include "she", "her", "hers", respectively.
- d. In the case of any doubt or ambiguity in the interpretation of the above rules, the decision of the institution is final.
- e. The institution may change or amend the academic regulations or syllabi at any time and the changes or amendments shall be made applicable to all the students on rolls with effect from the dates notified by the institution.
- f. In the case of any doubt or ambiguity in the interpretation of the guidelines given, the decision of the Head of the institution is final.

Regulations for MALPRACTICES during the conduct of examinations

	Nature of Malpractices/Improper conduct	Punishment
1.a	If the candidate possesses or keeps accessible in examination hall, any paper, note book, programmable calculators, Cell phones, pager, palm computers or any other form of material concerned with or related to the subject of the examination (theory or practical) in which he is appearing but has not made use of (material shall include any marks on the body of the candidate which can be used as an aid in the subject of the examination) - FIRST TIME (whether copied or not)	 Expulsion from the examination hall and cancellation of the performance in that subject only. To keep the CC footage of the act as an evidence. To obtain a statement from student and get it authorized by observer and Chief superintendent.
1.b	If the candidate possesses or keeps accessible in examination hall, any paper, note book, programmable calculators, Cell phones, pager, palm computers or any other form of material concerned with or related to the subject of the examination (theory or practical) in which he is appearing but has not made use of (material shall include any marks on the body of the candidate which can be used as an aid in the subject of the examination) - SECOND TIME (whether copied or not)	 Expulsion from the examination hall and cancellation of the performance in that subject and all other subjects the candidate has already appeared including practical examinations, project work and shall not be permitted to appear for the remaining examinations of the subjects of that Semester/year. To keep the CC footage of the act as an evidence. To obtain a statement from student and get it authorized by observer and Chief superintendent.
1.c	If the candidate possesses or keeps accessible in examination hall, any paper, note book, programmable calculators, Cell phones, pager, palm computers or any other form of material concerned with or related to the subject of the examination (theory or practical) in which he is appearing but has not made use of (material shall include any marks on the body of the candidate which can be used as an aid in the subject of the examination) - REPITITION OF THE ABOVE ACT (After second time and whether copied or not)	 Nature of punishment to be given for the improper conduct shall be as per the recommendations of the committee. The committee comprising of Principal, Vice principal, Chief superintendent, Controller of Examinations and HoD to discuss and initiate the action to be taken and recommend. To keep the CC footage of the act as evidence. To obtain a statement from student and invigilator and authorized by Chief superintendent.
2.a.	If the candidate gives assistance or guidance or receives it from any other candidate orally or by any other body language methods.	 Expulsion from the examination hall and cancellation of the performance in that subject only of all the candidates involved. To keep the CC footage of the act as an evidence.

2.b	If the candidate communicates through cell phones / through any other means with any candidate or persons in or outside the exam hall in respect of any matter. (i) If the communication is with the person(s) who belongs to our college.	 Confiscation of the mobile or electronic gadgets involved and Expulsion from the examination hall and cancellation of the performance in that subject and all other subjects the candidate has already appeared including practical examinations, project work and shall not be permitted to appear for the remaining examinations of the subjects of that Semester/year. To obtain all relevant proofs of evidence from the Mobile/ gadgets and handing over of the same to the candidate. To keep the CC footage of the act as evidence. To obtain a statement from student and invigilator and authorized by observer and Chief superintendent.
	(ii) If the communication is with the person(s) outside the campus or people who are not related to our college.	 Confiscation of the mobile or electronic gadgets involved and Expulsion from the examination hall and cancellation of the performance in that subject and all other subjects the candidate has already appeared including practical examinations, project work and shall not be permitted to appear for the remaining examinations of the subjects of that Semester/year. To obtain all relevant proofs of evidence from the Mobile/ gadgets and handing over of the same to the candidate. To keep the CC footage of the act as evidence. To obtain a statement from student and invigilator and authorized by observer and Chief superintendent. The person(s) involved should be handed over to the police and a case is registered against him.
3.	If the candidate impersonates any other candidate in connection with the examination.	

		To constitute a committee comprising of Principal, Vice principal, Chief
		 superintendent, Observer, Controller of Examinations and HoD to discuss and initiate the above action with documented proofs. To keep the CC footage of the act as an evidence. To obtain a statement from student, invigilator, subject expert and authorized by observer and Chief Superintendent.
4	If the candidate mishandles the Answer book or additional sheet or takes out or arranges to send out the question paper during the examination or answer book or additional sheet, during or after the examination. Also, if the answer script is mutilated / damaged disturbing the shape, of the script, answers, the bar code intentionally.	Expulsion from the examination hall and cancellation of performance in that subject and all the other subjects the candidate has already appeared including practical examinations and project work and shall not be permitted for the remaining examinations of the subjects of that semester.
	Script, answers, the bar code intentionally.	 In addition to the above punishment, a committee shall be constituted and recommends appropriate punishment for the improper conduct. To keep the CC footage of the act as an evidence. To Obtain a statement from student and invigilator and authorized by observer and Chief superintendent.
5.	Uses objectionable, abusive or offensive language in the Examination hall.	 Expulsion from the examination hall and cancellation of the performance in that subject only. To Obtain a statement from student and invigilator and get it authorized by Observer and Chief superintendent.
6.	Refuses to obey the orders of the Chief Superintendent/ACE/ any officer on duty or misbehaves or creates disturbance of any kind in and around the examination hall or organizes a walk out or instigates others to walk out, or threatens the officer-in charge or any person on duty in or outside the examination hall of any injury to his person or to any of his relations whether by words, either spoken or written or by signs or by visible representation, assaults the officer-in-charge, or any person on duty in or outside the examination hall or any of his relations, or indulges in any other act of misconduct or mischief which result in damage to or destruction of property in the examination hall or any part of the College campus or engages in any other act which in the opinion of the officer on duty amounts to use of unfair means or misconduct or has the tendency to disrupt the orderly conduct of the examination.	

7.	Leaves the exam hall taking away answer script or intentionally tears of the script or any part thereof inside or outside the examination hall.	Expulsion from the examination hall and cancellation of performance in that subject and all the other subjects the candidate has already appeared including practical examinations and project work and shall not be permitted for the remaining examinations of the subjects of that semester/year. The candidate is also debarred for two consecutive semesters from class work and all University examinations. The continuation of the course by the candidate is subject to the academic regulations in connection with forfeiture of seat.
		 To constitute a committee comprising of Principal, Vice principal, Chief superintendent, Observer, Controller of Examinations and HoD to discuss and initiate the above action. To keep the CC footage of the act as an evidence. To Obtain a statement from student and invigilator and authorized by observer and Chief superintendent.
8.	Possess any lethal weapon or firearm in the examination hall.	Expulsion from the examination hall and cancellation of the performance in that subject and all other subjects the candidate has already appeared including practical examinations and project work and shall not be permitted for the remaining examinations of the subjects of that semester/year. The candidate is also debarred and forfeits the seat.
		 To constitute a committee comprising of Principal, Vice principal, Chief superintendent, Observer, Controller of Examinations and HoD to discuss and initiate the above action with documented proofs To keep the CC footage of the act as an evidence. To obtain a statement from student and invigilator and authorized by observer and Chief superintendent. The candidate shall be handed over to
9.	If a student of the college, who is not a candidate for the particular examination or any person not connected with the college indulges in any malpractice or improper conduct mentioned in clause 6 to 8.	Police and register a case. If the student belongs to our college: Expulsion from the examination hall and cancellation of the performance in that subject and all other subjects the candidate has already appeared including practical examinations and project work and shall not be permitted for the remaining examinations of the subjects of that semester. The candidate is also debarred and forfeits the seat.

		 Person(s) who do not belong to the College will be handed over to police and, a police case will be registered against them. To constitute a committee comprising of Principal, Vice principal, Chief superintendent, Observer, Controller of Examinations and HoD to discuss and initiate the above action. To keep the CC footage of the act as an evidence. To Obtain a statement from student and invigilator and authorized by observer and Chief superintendent.
10	Comes in a drunken condition to the examination hall.	 Expulsion from the examination hall and cancellation of the performance in that subject and all other subjects the candidate has already appeared including practical examinations and project work and shall not be permitted for the remaining examinations of the subjects of that semester. To keep the CC footage of the act as an evidence(If any). To obtain a statement from invigilator and any others as witness authorized by observer and Chief superintendent.
11	Copying detected on the basis of internal evidence, such as, during valuation or during special scrutiny.	 Cancellation of the performance in that subject and all other subjects the candidate has appeared including practical examinations and project work of that semester/year examinations. To Obtain a statement from Valuer / Chief Valuer authorized by Spot Coordinator and Controller of Examinations.

Salient Features

Ragging within or outside any educational institution is prohibited.

Ragging means doing an act which causes or is likely to cause Insult or Annoyance of Fear or

Apprehension or Threat or Intimidation or outrage of modesty or Injury to a student

In Case of Emergency CALL TOLL FREE NO. : 1800 - 425 - 1288 LET US MAKE MVGR A RAGGING FREE CAMPUS ABSOLUTELY SAY NO TO RAGGING

- 1. Ragging is prohibited as per Act 26 of A.P. Legislative Assembly, 1997.
- 2. Ragging entails heavy fines and/or imprisonment.
- 3. Ragging invokes suspension and dismissal from the College.
- 4. Outsiders are prohibited from entering the College and Hostel without permission.
- 5. Girl students must be in their hostel rooms by 7.00 p.m.
- 6. All the students must carry their Identity Cards and show them when demanded
- 7. The Principal and the Wardens may visit the Hostels and inspect the rooms any time.

ACADEMIC REGULATIONS (R24) FOR B.TECH. (LATERAL ENTRY SCHEME)

(Effective for the students getting admitted into II year through Lateral Entry Scheme from the Academic Year **2024-2025** onwards)

1. Award of the Degree

- (a) Award of the B.Tech. Degree / B.Tech. Degree with a Minor if he/she fulfils th following:
 - Pursues a course of study for not less than three academic years and not more than six academic years. However, for the students availing Gap year facility this period shall be extended by two years at the most and these two years would in addition to the maximum period permitted for graduation (Six years).
 - (ii) Registers for 120 credits and secures all 120 credits.

(b) Award of B.Tech. degree with Honors

A student will be declared eligible for the award of the B.Tech. with Honors if he/she fulfils the following:

- (i) Student secures additional 16 credits fulfilling all the requisites of a B.Tech. program i.e., 120 credits.
- (ii) Registering for Honors is optional.
- (iii) Honors is to be completed simultaneously with B.Tech. programme.
- 2. Students, who fail to fulfil the requirement for the award of the degree within <u>six</u> consecutive academic years from the year of admission, shall forfeit their seat.

3. Minimum Academic Requirements

The following academic requirements have to be satisfied in addition to the requirements mentioned in item no.2

- i. A student shall be deemed to have satisfied the minimum academic requirements and earned the credits allotted to each theory, practical, design, drawing subject or project if he secures not less than 35% of marks in the end examination and a minimum of 40% of marks in the sum total of the mid semester evaluation and end examination taken together.
- ii. A student shall be promoted from III year to IV year if he/she fulfills the academic requirements of securing 40% of the credits (any decimal fraction should be rounded off to lower digit) in the subjects that have been studied up to either V semester or VI semester from the following examinations irrespective of whether the candidate takes the examination or not.
- iii. And in case if student is already detained for want of credits for particular academic year, the student may make up the credits through supplementary exams of the above exams before the commencement of IV year I semester class work of next year.

4. Course Pattern

- i) The entire course of study is three academic years on semester pattern.
- ii) A student eligible to appear for the end examination in a subject but absent at it or has failed in the end examination may appear for that subject at the next supplementary examination offered. iii) When a student is detained due to lack of credits/shortage of attendance the student may be re-admitted when the semester is offered after fulfilment of academic regulations, the student shall be in the academic regulations into which he/she is readmitted.
- **5.** All other regulations as applicable for B. Tech. Four-year degree course (Regular) will hold good for B. Tech. (Lateral Entry Scheme).

	Pre-requisite	Higher Secondary School Physics	3	0	0	3			
Course Objective									
To bridge the gap between the Physics in school at 10+2 level and UG level engineering courses by									
introducing the lea	arners to domains like	crystallography, light wave phenome	na, co	here	nt rad	iation,			
quantum etiquettes	s, and magneto-dielectr	ic materials.							
Course Outcomes	5								
After completion o	of the course, the studer	nts will be able to							
1 Examine the	e crystallographic pha	ase of the unknown specimen by u	sing 2	K-ray	/ diff	action			
method. (BL	4)								
2 Categorize	the dielectric polarizat	ion mechanisms, and classify the ma	gnetic	mat	terial	for an			
_	lication. (BL4)	-	-						
3 Analyze the	intensity variation of li	ght due to interference, diffraction and	polar	izatio	on. (B	L4)			
	-	in the given medium; and categori	_						
envisioned co	ommunication requiren	nents. (BL4)		•					
	-	particle in a potential box; analyze the	e semi	cond	uctor	carrier			
		pe by using the Hall effect. (BL4)							
		ase, magneto-dielectric physiognomie	s, opt	ical	pheno	omena,			
		s, quantum confinement effects, a	· .		+				
	or band model. (BL6)								
SYLLABUS									
Unit I	CF	RYSTAL PHYSICS		8	8 hrs				
Space Lattice- Un		s; Bravais lattices; Atomic packing fi	actior	- Sii	mple	Cubic-			
		structure- Calculation of lattice cor							
		veen successive h k l planes; X-ray Di		•	-				
	raction method- Applic				00	,			
Unit II	**	ND DIELECTRIC MATERIALS		8	8 hrs				
Magnetic dipole r	noment – Permeabilit	y- Magnetization- Atomic origin of	magne			Para,			
		naterials; Hysteresis- Soft and Hard	-						
	-	or- Dielectric polarization – Relatior	-	-					
	1	polarization- Orientation polarization							
	Clasius-Mossotti relat	· · · · · ·							
Unit III		WAVE OPTICS		8	8 hrs				
	rposition. Theory of i	interference fringes; Interference in t	hin fi			e law:			
		n at a single slit- Intensity distribut							
		Brewester's law; Double refraction; (
plates	incurrent og renteetion-	Dienester 5 law, Double feitaction, C	< "		# 11UII	, ,,uvc			
Unit IV		PHOTONICS		5	8 hrs				
	taneous and Stimulat	red emission of radiation; Einstein	coeffi			elation			
		racteristics- Applications; Population							
		- Construction- Working- Advantages;							
components of fas	ier system, Ruby laser-	construction working- Auvailages,	opine	1100	1 1 1 1	icipic-			

Components of fiber; Numerical aperture- Acceptance angle- Acceptance cone; Classification of optic fiber- Step Index- Graded Index fibers.

Unit VQUANTUM PHYSICS AND SEMICONDUCTORS8 hrsMatter Wave- de Broglie wavelength of matter wave; Uncertainty principle- Wave function- Physical
significance; Schrodinger Time-independent wave equation; Particle in a 1D potential box- Energies
and Wave functions; Fermi-Dirac distribution function- Distinction between metals, insulators and
semiconductors; Intrinsic semiconductors- Carrier concentration- Fermi level; Extrinsic
semiconductors- Carrier concentration; Hall effect

	develo	op an understanding on	material use, protection an	nd ener	gy stora	age. (E	BL 6)		
SYLLABUS									
Unit I			GH POLYMERS				8 hr		
			s; Types of Polymeri						
			– Mechanism; Plastics –	• •		-			
			Properties and Application						
-		-	vnthetic –Vulcanization; F	-	-	-			
			er; Fiber Reinforced Plast				• -		
			Conducting polymers - In	Iroduci	10II - C	lassiii	cation		
	u exui	nsic – Applications							
Unit II		ELECTROCHEMI	STRY AND ITS APPLI	CATIC	ONS		8 hr		
Introduction	- Elec	etrode Potential – Mea	surement of electrode po	otential	- Elec	troche	emical		
series; Expres	ssion	for electrode potential	- Electrochemical cell -	EMF of	of the c	ell; St	torage		
		-	nché cell; Secondary - So			•			
			lrogen – Oxygen fuel cell						
		e Fuel Cells; pH Me	try; Conductometry; Pot	entiom	etry -	Princi	ple –		
Applications.					~				
Unit III			AND MOLECULAR SV				8 hr		
	-	1.	agnetic radiation; Classif			-			
			ption – Derivation of I						
			y - 1 - Introduction -						
Spectroscopy	- 2 -	instrumentation (block	diagram) – Applications;	Intra -	- Ked S	pectro	scopy		

- 1 – Introduction to Infra - Red Spectroscopy – Principle; Infra – Red Spectroscopy – 2								
Instrumentation (block diagram) – Applications; Molecular switches - NOR and NOT logic								
gate operators - Characteristics - Rotaxanes and Catenanes as artificial molecular machines.								
Unit IV CORROSION 8 hr								
Chemical Corrosion - Mechanism - Pilling Bed worth rule; Electrochemical Corrosion -								
Mechanism - Difference between dry and wet corrosion - Galvanic series; Types of Corrosion								
- Differential aeration corrosion, galvanic corrosion, pitting corrosion, waterline corrosion and								
stress corrosion; Factors influencing rate of corrosion - Metal-based factors and Environmen								
based factors; Corrosion control Methods - Proper design, Use of Pure metal, Use of Alloy								
Cathodic protection - Sacrificial Anodic protection method - Impressed current cathodic								
protection method- Use of Inhibitors; Protective coatings - Types - Metal Coatings - Anodic								
Galvanizing and Cathodic Coating - Tinning; Passivation and Pourbaix diagram - Pourbaix								
diagram.								
Unit V CONCEPTS OF GREEN CHEMISTRY, NANO CHEMISTRY AND 8								
SOLAR ENERGY hrs								
Green Chemistry - Introduction - Principles of Green Chemistry; Applications - Any green								
two reactions; Nanomaterials - Introduction - Classification; Synthesis of Nano material by								
Top down and bottom-up approach; CVD Method – Sol gel method – Synthesis of iron oxide								
nano particles; Carbon nano tubes - Introduction - Classification - Applications; Harnessing								
of Solar Energy – Construction and Working of PV Cell; Solar collectors – Concentrating.

K24W		Total Contact Hours	28 (L)	L	Т	P	С	
		Pre-requisite	Basics of $10 + 2$ Chemistry	0	0	2	1	
Cours	se Objective							
This c	ourse aims to	help students						
•	To verify th	e fundamental concepts	s with experiments					
Cours	se Outcomes							
After o	completing th	nis course, the students	will be able to					
1	Determine	total hardness, dissolve	ed oxygen, strength of acid in	al	ead ac	cid bat	ttery,	
	using volun	netric analysis						
2	Explain co	onductometric, potenti	ometric, pH metric titration	ns a	ind c	olorin	netric	
	determinati	ons.						
3	Explain the	synthesis of a polymer	, nanomaterials.					
LIST	OF EXPER	IMENTS						
1	Determinat	ion of HCl using sodiur	n carbonate					
2	Determinat	ion of Strength of an ac	id in Pb-Acid battery					
3	Determinat	ion of Iron (II) using po	tassium dichromate.					
4	Determinat	ion of Hardness of a gro	oundwater sample.					
5	Determinat	ion of Dissolved oxyger	n in ground water sample.					
6			vith potassium dichromate					
7		etric titration of Strong						
8		etric titration of Weak a						
9		itration of strong acid a						
10			n in Cement sample by colorim	etry				
ADDI		XPERIMENTS	¥ •					
1	Preparation	of nanomaterials by pr	ecipitation method					
2		of Bakelite	*					
3	Determinat	ion of Cell constant of a	a conductivity cell.					
ADVA		SIGN EXPERIMENTS						
1	Determinat	ion of viscosity of poly	mer solution using survismeter.					
2		ent of 10Dq by spectrop

LIST	OF EXPERIM						
1	Week-1: Intro	duction to Programmin	g with operators	6			
		program to print "Hello			nd the str	ucture of	f a basic C
	program.		·				
		program to demonstrate	the use of basic	c I/O st	atements	(printf,	scanf)
	3. Write a C	program for calculating	the sum of two	numbe	ers.	-	
2		ressions and Operators					
	1. Write a C	program to finding the	maximum of thr	ee num	bers usin	g condit	ional
	operator.						
	2. Write a C	Program to convert tem	perature from C	elsius 1	to Fahren	heat and	vice versa
		Program to to calculate	simple and com	pound	interest		
3		ction Statements					
		program to find the larg			-		
		ogram to demonstrate th		-case st	atements	to perfo	rm
		operations based on use					
		ogram to demonstrate th	ne use of else-if	ladder	to grade s	student r	narks.
4	Week-4: Loop	-					
		program to print sum of	-	-			
		program to print the Fib	1			0	oop.
		program to check the gi					
		program to calculate the		umber	using a w	hile loo	р.
5		ed Loops and branching	·		a d 1		
		program to print a pyran					
		program to print prime				totomore	ta within
		program to demonstrate	the use of brea	k and C	onunue s	latemen	is within
6	loops. Wools 6: Arma						
6	Week 6: Arra		of all alarsart	in a 11) amor-		
		program to find the sum			•	atrix for	
		program to read and pri	•			airix Ior	111.
	5. write a C	program to perform mat	urix addition usi	ng 2D a	arrays.		

	4. Write a C program to find the transpose of a given matrix.
7	Week-7: String Handling
	1. Write a program to demonstrate string operations (copy, concatenate, compare,
	length) using built-in functions.
	2. Write a C program to count the number of vowels in a string.
	3. Write a C program to concatenate two strings without using the library function
	strcat.
8	Week-8: Functions
	1. Write a program to define and use a function to find the sum of two numbers.
	2. Write a C program to check the given number is prime or not using a function.
	3. Demonstrate passing of an array to a C function.
9	Week-9: Recursive Functions
	1. Write a recursive program to generate Fibonacci series.
	2. Write a C program to find the GCD of two numbers using a recursive function.
	3. Write a C Program to find the nCr value for the two positive numbers where $n > r$
	using recursion.
10	Week-10: Pointers & Dynamic Memory Allocation
	1. Write a program to demonstrate pointer arithmetic.
	2. Write a program to use pointers to access elements of an array.
	3. Write a program to dynamically allocate memory for an array using malloc and
	calloc.
	4. Write a program to demonstrate the use of realloc and free for dynamic memory
	allocation.
11	Week-11: Structures & Unions
	1. Write a program to define, declare, and access members of a structure.
	2. Write a program to demonstrate the use of nested structures.
	3. Write a C program to store and display student information using structures.
12	Week-12: File Handling
	1. Write a program to demonstrate file handling functions (fopen, fclose, fscanf,
	fprintf).
	2. Write a program to read and write data to a binary file using fread and fwrite.
	3. Write a C program to simulate copy command using command line arguments.

R24MMECD001		COMPUTER AIDED ENGINEERING DRAWING (CSE, IT,CSIT,AIML,DS,ICB)							
		Total Contact Hours	14(T)+28(P)	L	Т	Р	C		
		Pre-requisite	-	1	0	2	2		
Course (Objective:	To enable the students	to learn various concepts of eng	ginee	ring	grap	hics		
using the	CAD tool.								
Course C	Outcomes								
1	Sketch th	ne two-dimensional draw	ings using draw, modify, and ann	otati	on co	mma	inds		
	in CAD s	in CAD software							
2	Draw the	projections and solve th	e problems in projections of poin	ıts, li	nes, j	plane	:s &		
	solids.				-				
3	Create or	thographic projections an	nd isometric projections and creat	e cor	npos	ite so	olids		
using CAD software.									
SYLLAB	BUS								

Module 1:

Overview of CAD Software:

Computer technologies that impact graphical communication, Demonstrating knowledge of CAD software such as The Menu System, Toolbars, Command window, and Status Bar. Set up the drawing page and the printer, Scale settings, setting up of units and drawing limits,

Set up the drawing page and the printer, Scale settings, setting up of units and drawing limit standards for annotations, and 3D Modeling.

Module 2:

Introduction to Orthographic Projections: Projections of points, straight lines, planes and simple solids

Module 3:

Development of surfaces of simple solids, isometric views, Conversion of isometric views to orthographic views. And create complex compound solids in CAD

List of Exercises

1	Creation of simple 2-D geometries
2	Creation of complex 2-D geometries & Engineering Curves –Generic method for
	Conic sections
3	Engineering Curves – Cycloids & Involutes
4	Orthographic Projection of Points
5	Projection of lines in simple positions and inclined to one plane
6	Projection of lines inclined to both planes
7	Projection of planes is simple and inclined to one plane
8	Projection of planes inclined to both planes
9	Projection of solids simple positions
10	Development of simple Solids (Prisms, Pyramids, Cylinder & Cone)
11	Conversion of orthographic views to isometric views
12	Modeling of complex 3D geometries and their conversion to orthographic views

2 1		ending order using Merg	ge Sort Technique.				
3 V		B(LINKED LIST)	to a Single lighted list and man	h'	0.5.	onot:	n o
•		gle Linked List.	ate a Single linked list and perform	Uas1	c op	eratio	ns on
4 V		GIE LINKEG LIST.	COELINKEDLIST)				
4 1			e a Circular linked list and perform h			notion	0
•		U	1		-		
			e a Double linked list and perform b	asic	oper	ations	•
		5 (STACKS & APPLIC	-				
•		•	ement Stack operations using arrays.				
•			ement Stack operations using linked		, 1		
•		U 1	ement Infix to postfix conversion usi	0	tack	s.	
•			ate the Postfix Expression using state	cks.			
6 V		(QUEUES)					
•		•	ement Queue operations using arrays				
•		0 1	ement Queue operations using linked	l list			
•	Wr	ite a C Program to imple	ement Circular Queue operations.				

7	WEEK 7 (BINARY TREE)
	• Write a C Program to implement Binary Tree Creation.
	• Write a C Program to implement Recursive Binary Tree Traversals.
8	WEEK 8 (BINARY SEARCH TREE(BST))
	• Write a C Program to implement Binary Search Tree creation.
	• Write a C program to implement Insertion, Deletion, Search operations on Binary
	Search Tree.
9	WEEK 9 (GRAPHS & TRAVERSAL TECHNIQUES)
	• Write a C Program to create a Graph (using Adjacency Matrix or Adjacency List).
	• Write a C Program to implement Graph Traversals -Breadth First Search and
	Depth First Search.
10	WEEK 10 (GRAPH APPLICATIONS)
	• Write a C Program to implement Prim's & Kruskal's Algorithm for finding
	Minimum Cost Spanning Tree.
	• Write a C Program to implement Single Source Shortest Path -Dijkstra's
	Algorithm.
11	WEEK 11 (HEAPS)
	• Write a C Program to implement Binary Heap (Min Heap or Max Heap).
12	WEEK 12 (HASHING)
	• Write a C Program to implement Collision Resolution Techniques using Linear
	probing (Open Addressing) Technique using Division method as hash function.

1	Week-1		1				
	1)	Write a program to re		board an	d print	outputs	on to
		console screen using C		- 4			
	2)	Write a program to wo		a types i	ising C-	++.	
2	3)	Write a program to do	typecasting in C++.				
2	Week-2		ata alagaa and ahia	ta naina	C		
	1)	Write a program to cre	5	U U			
	2) 3)	Write a program to imp Write a program to imp			•		
3	Week-3			$\Pi C + +$.			
5	1)	Write a program to imp	alement inline functi	ons in C	' ⊥⊥		
	2)	Write a program to imp					
	3)	Write a program to imp	-	-			
4	Week-4		prement arrays coned	pt in C	1.		
I	1)	Write a program to im	plement function over	erloadin	o in C+-	F	
	$\frac{1}{2}$	Write a program to imp			-		++.
5	Week-5				ou oluse	<u>es in e</u>	
C		e programs to implement	nt different types of	inheritar	ices in C	CPP	
6	Week-6		<u> </u>			_	
	1)	Write a program to im	plement function over	erriding	in C++.		
	2)	Write a program to im					
7	Week-7						
	1)	Write a program to imp	plement to pure virtu	al funct	ions in (C++.	
	2)	Write a program to cre					
8	Week-8						
	1)	Write a program to im	plement composition	n in C++			
	2)	Write a program to im					
9	Week-9		-				
	1)	Write a program to imp	plement bubble sort	using ter	mplates	in C++	•
	2)	Write a program to im	plement template cla	sses in (C++.		

10	Week-10:
	1) Write a program to work with Exception handling keywords: try, throw,
	catch in C++.
	2) Write a program to implement user-defined exceptions
11	Week-11:
	1) Write a program to implement Lists in C++.
	2) Write a program to implement iterators in C++.
12	Week-12:
	1) Write a program to implement vectors in C++.
	2) Write a program to implement maps in C++.
LEARNI	NG RESOURCES
TEXTBO	DOKS:
1	C++ Primer, fifth edition, Stanley B. Lippman, Josee Lajoie.
2	C++ The Complete Reference : HERBERT SCHILDT, 4 th Edition
REFERI	ENCE BOOKS:
1	Object-Oriented Programming with C++ 8 th Edition by Balagurusamy
2	Object-Oriented Programming with C++ 4 th Edition by Robert Lafore
3	Object-Oriented Programming with C++ by A.K. Sharma

SYLLABUS					
Jnit I INTRODUCTION TO ALGORITHMS. DISJOINT SETS 8 hr					
Algorithm, Algorithm specification - Pseudo code conventions; Recursive and Non-					
Recursive Algorithms; Performance Analysis - Space complexity, Performance Analysis -					
Time complexity; Asymptotic Notations (O, Ω , Θ); Amortized Complexity; Disjoint sets,					
Representation of disjoint sets; Disjoint operations – union and find algorithms; Collapsing					
ind and Weighted Union;Unit IIPATTERN MATCHING, DIVIDE AND CONQUER8 hr					
Pattern Matching, Applications, Naive String-Matching Algorithm, Boyer-Moore					
Algorithm; Knuth-Morris-Pratt Algorithm; Divide and Conquer general method; Binary					
Search; Finding the Maximum and Minimum; Merge sort; Quick sort; Strassen's Matrix					
Multiplication;					
Unit III GREEDY METHOD 8 hr					
Greedy Technique general method; Knapsack Problem; Job Sequencing with Deadlines;					
Optimal storage on tapes; Minimum Cost Spanning Trees – Prim's Algorithm; Minimum Cost					
Spanning Trees – Kruskal's Algorithm; Single Source Shortest Path; Huffman Coding;					
Unit IV DYNAMIC PROGRAMMING 8 hr					
Dynamic Programming general method; Matrix Chain Multiplication; All-pairs Shortest					
path problem; Optimal Binary Search Trees; Single source shortest path: Bellman and Ford algorithm; 0/1 Knapsack Problem; Travelling Sales Person Problem; Reliability Design;					
Unit VBACKTRACKING, BRANCH AND BOUND8 hr					
Backtracking general method, N-Queens Problem; Sum of subsets problem; Graph Coloring;					
Hamiltonian cycles; Branch and Bound general method, Control abstraction of LC-Search;					
0/1 Knapsack Problem using FIFO Branch and Bound; 0/1 Knapsack Problem using LC					
Branch and Bound; Travelling salesperson problem;

			Queue operations using linked li	ist				
L				~ *				

	• Write a C Program to implement Circular Queue operations.
7	WEEK 7 (BINARY TREE)
	• Write a C Program to implement Binary Tree Creation.
	• Write a C Program to implement Recursive Binary Tree Traversals.
8	WEEK 8 (BINARY SEARCH TREE(BST))
	• Write a C Program to implement Binary Search Tree creation.
	• Write a C program to implement Insertion, Deletion, Search operations on Binary
	Search Tree.
9	WEEK 9 (GRAPHS & TRAVERSAL TECHNIQUES)
	• Write a C Program to create a Graph (using Adjacency Matrix or Adjacency List).
	• Write a C Program to implement Graph Traversals -Breadth First Search and Depth
	First Search.
10	WEEK 10 (GRAPH APPLICATIONS)
	• Write a C Program to implement Prim's & Kruskal's Algorithm for finding
	Minimum Cost Spanning Tree.
	• Write a C Program to implement Single Source Shortest Path -Dijkstra's
	Algorithm.
11	WEEK 11 (HEAPS)
	• Write a C Program to implement Binary Heap (Min Heap or Max Heap).
12	WEEK 12 (HASHING)
	• Write a C Program to implement Collision Resolution Techniques using Linear
	probing (Open Addressing) Technique using Division method as hash function.

		odule					
2	Week -						
		rite a program to calcula	-				
			calculate compound inter				
			print ASCII value of a ch	aracter			
		1. 1. 6	o find the area of a circle	ornot			
			the given number is prime o find the area of a triangle				
		Vrite a program to perfor					
3	Week -						
5		te Numpy operations.					
	1	Program to read, proces	s and display data				
	2	• •	using various numpy funct	ions on	1D ar	ravs	
	3	-	functions of Numpy on 2D		12 ui	ays.	
4	Week -		r,	j			
			o display minimum and m	aximun	n amoi	ng thre	ee
		numbers.	1 2			-	
	2. V	Write a python program	to count the number of e	even and	d odd	numb	bers
		rom a series of numbers					
			o display Fibonacci series	using it	eratio	n and	
		recursion.	1 .	C			
	4. V	Vrite a python program	to find the factorial of a	a numbe	er wit	h an	d
		without recursion.					

5	Week – 5:
5	 Write a python program to find sum of elements in a list recursively
	 Write a python program to determine number of times a given letter
	occurs in a string using recursion
	 Write a python program to find if a number is prime or not a prime using
	recursion
	4. Write a python program to find the product of two numbers using recursion.
	 Write a python program find the product of two numbers using recursion. Write a python program find the power of a number using recursion.
6	Week – 6:
0	1. Write a python program to find the largest and smallest number in a list.
	 Write a python program to merge two lists and sort it.
	 Write a python program to merge two fists and soft ft. Write a python program to remove the duplicate items from a list.
	 Write a python program to check if a string is a palindrome or not.
	 Write a program to replace all the occurrences of a with x in a string.
7	Week – 7:
/	1. Write a program to create a list of tuples with the first element as thenumber
	and the second element as the square of the number.
	 Write a python program that takes the list of tuples and sorts the list oftuples
	in increasing order by the last element in each tuple.
	3. Write a python program to add a key value pair to a dictionary andupdate
	the dictionary based on the key.
8	Week – 8:
Ũ	1. Illustrate in operator and write a python program to count number of
	lowercase characters in a string.
	 Illustrate the following functions of list 1) len 2) extend 3) sort
	4) append 5) insert 6) remove
	3. Program to pass list as an argument to function illustrate with example
	4. Illustrate the following methods of dictionary with examples
	1) keys() 2) values() 3) items() 4) pop() 5) delete()
	5. Write a Program to do a reverse dictionary lookup in python.
9	Week – 9:
	1. Write a program to generate 20 random numbers in the range of 1 to100 and
	write to a file
	2. Program to Illustrate seek(), tell() and flush() methods with different
	arguments.
	3. Program to Illustrate read, readline and readlines methods.
10	Week – 10:
	1. Program to illustrate how to import data from CSV to DataFrame using
	Pandas.
	2. Program to illustrate how to Inspect data in DataFrame using head(),tail ()
	and describe() functions.
	3. Program to perform sorting and slicing operations.
11	Week – 11:
	1. Program to design an application to display –Hello World.
	2. Program to design an application using Label, Entry and Button widgets.
	3. Program to design an application using Tkinter Geometry methods pack(),
	grid(), place() methods.
10	4. Program to design an application using CheckButton and Radiobuttonwidgets.
12	Week – 12:
	1. Program to design an application using Menu and Menubutton widgets.

	2. Program to design an application using Listbox and Scrollbar widgets.
	3. Program to design an application using Messagebox and File Dialog
	widget
Demonst	ration experiments
1	Demonstration of Python IDLE to implement solutions.
2	Demonstration on Colab notebook to read, access and display data from google drive.
3	Demonstration on jupyter notebook to link and access data.

1	Experimen	Experiment 1: Creating a Personal Budget in Excel								
Experiment 2: Building and Analyzing a Balance Sheet										
	Week 2: P	Personal Finance Funda	mentals							
2		8	ements (balance sheet, incon	ne sta	ateme	ent)				
2	-	-	alyzing an Income Statement							
		t 2: Creating a Cash Flow								
		inancial Analysis using								
3		analysis and financial p								
6	-	t 1: Calculating Liquidity	•							
	Experiment 2: Analyzing Profitability Ratios									
		Financial Analysis using								
4		nalysis and financial pe								
	-	t 1: Assessing Solvency								
	-	t 2: Visualizing Financia								
		Financial Analysis using								
5		ig and graphing financia	2							
	-	at 1: Creating Bar Charts								
			raphs for Trend Analysis							
		inancial Analysis using g and graphing financia								
6			8							
	-		Illustrate Financial Compositio)II						
		nt 2: Building a Financial nvestment Basics	Dashoualu							
		anding stocks and bond	6							
7		and ing stocks and bond at 1: Analyzing Stock Per								
	-	at 2: Evaluating Bond Pri-								
		at 3: Comparing Stocks a								
	Experimen	it 5. Comparing Stocks a								

	Week 8: Investment Basics
8	Basic investment strategies and risk management
0	Experiment 1: Understanding Risk and Return
	Experiment 2: Diversification Strategies
	Week 9: Capital Budgeting Basics
	Understanding capital budgeting decisions using Excel (NPV, IRR, Payback
9	Period)
7	Experiment 1: Calculating Net Present Value (NPV)
	Experiment 2: Determining Internal Rate of Return (IRR)
	Experiment 3: Analyzing Payback Period
	Week 10: Capital Budgeting Basics
10	Project evaluation and selection using Excel formulas
10	Experiment 1: Evaluating Investment Projects
	Experiment 2: Decision Criteria and Project Selection
	Week 11: Taxation and Financial Planning
	Income tax calculations using Excel (personal and business)
11	Basic financial planning and retirement savings strategies
	Experiment 1: Personal Income Tax Calculations
	Experiment 2: Business Income Tax Calculations
	Week 12: Taxation and Financial Planning
12	Basic financial planning and retirement savings strategies
12	Experiment 1: Personal Financial Planning
	Experiment 2: Retirement Savings Strategies

Computer Science Cluster (CSC) (for MEC, ECE, EEE, CIV and CHE)

			DATA STRUCTURES	S					
R24MSC	CST003	Total Contact Hours	42 (L)	L	Т	P	С		
		Pre-requisite	Basic Programming	3	0	0	3		
Course Ob	jective								
Students w	ill get exp	osure to use data struct	ures such as arrays, link	ed lis	sts, st	acks	, queues,		
			ect and implement the app						
to solve the	given pro	blem.							
Course Ou	tcomes								
1	Will be at	ole to apply various sea	urching and sorting techn	iques	and	ana	lyze their		
	time complexities. (BL3)								
2 Will be able to apply Linked Lists and its variants and utilize them for various									
	application	ns. (BL3)							
3	Will be a	ble to compare arrays	and Linked Lists and c	conclu	ide v	vhic	h storage		
	structure i	s appropriate for the giv	en problem/data structur	e. (B	L4)				
4	Will be al	ble to develop novel so	olutions to small scale p	rogra	mmiı	ng cl	hallenges		
			stacks, queues, trees and						
5			ios where hashing is ad	vanta	geous	s, an	d design		
		d solutions for specific							
6			teams to design and	-					
		by choosing and comb i	ining the appropriate data	a stru	cture	(s). (BL6)

ONLINE	COURSES
1	Coursera: "Operating Systems and System Programming"
	• Offered by Stanford University, this course covers fundamentalconcepts
	and principles of operating systems.
	https://www.coursera.org/specializations/codio-introduction-
	operating-systems
2	edX: "Introduction toss Operating Systems"
	• Provided by Georgia Institute of Technology, this course explores the
	design and implementation of modern operating systems.
	• Link: <u>https://www.udacity.com/course/introduction-to-operating-</u> <u>systems</u>
	<u>ud923</u>
3	MIT OpenCourseWare: "Operating System Engineering"
	• A free online course from MIT, offering in-depth coverage of operating
	system design and implementation.
	Link:
	• <u>https://ocw.mit.edu/courses/6-828-operating-system-engineering-fall-2012/</u>

	Outcome		•				
After con	npleting (this course, the students v	will be able to				
1	Student	s will be able to design	the database for th	e given clien	t requi	ireme	nts using ER-
	Model	and also be able to con	vert the ER desigr	to R model	by co	verin	g all sorts of
	constrai	ints					
2	Student	s will be able to retrie	eve the data for a	ny given use	r cons	traint	s using SQL
	features	s group by, nested Querie	es and joins				
3	Student	s will be able to des	sign the different	views and a	lso al	ole to	identify the
	execution	on differences between a	query and query as	s a view.			
4	Student	s will be able to identify	the importance of c	lata and auditi	ng.		
List of E	xperime	nts					
1,2	Designi	ing of ER model for the g	given constraints				
3	Conver	sion of entities to rela	ational tables wit	h constraints	usin	g DI	DL statements
	(CREA	TE, ALTER, DROP)					
4	Conver	sion of relations to relati	onal tables with re	ferential integ	grity co	onstra	int (using
	ON DE	LETE CASCADE and C	ON UPDATE CASO	CADE) and D	ML op	eratio	ons
	(INSER	RT, DELETE, UPDATE)					
5	Queryir	ng the data using SELEC	T, WHERE, AND,	BETWEEN,	LIKE		
6		ng string, number and dat					
7	Queryir	ng the data using set oper	ations(UNION, UN	NON ALL, IN	IRESE	ECT,	
		S/EXCEPT) and GROUP	,				
8		ng the data using Nested			ISTS,	NOT	EXISTS,
		dent queries- IN, NOT I					
9	Queryir	ng the data using JOINS a	and Handling NUL	L values using	g JOIN	IS	
10	Designi	ing views for different us	er perspectives (up	datable views	and no	on-up	datable
	views),						
11	Designi	ing of procedures and fur	nctions in PL/SQL				
12	-	of Triggers					
Addition	nal experi						
1	_	ce generation and its usag	ge as primary key				
2		ng DCL-grant, revoke					
3		ng TCL commands- com	mit, roll back and s	ave point.			
Demons	tration ex	xperiments					
1	Case stu	udy - Library Managemer	nt system				
2		udy- E-commerce store n					
3	Case St	udy- Hospital manageme	ent				
LEARN	ING RES	<u>OURCES</u>					
TEXTB	OOKS:						
1	Data ba	ase System Concepts,	Silberschatz, Kort	h, McGraw	hill, S	bixth	Edition.
1	McGrav	wHill.					
2	Data ba	se Management Systems	, Raghurama Krish	nan, Johannes	Gehrl	ke	
3	Learnin	g SQL, Alan Beaulieu, C	PReilly Media, Inc.	, 3 rd Edition,	-

		PY	THON PROGRAMMING LAB				
R24MSC	SL005	Total Contact Hours	42(P)	L	Т	P	С
		Pre-requisite	-	0	0	3	2
Course O	bjective						
			ming constructs which are used	to c	leve	lop	both
		pplications using pytho				1	
Course O							
1	1		the basic building blocks of pyth	on l	angi	lage	like
		les, operators and modu	0 10		0	0	
2			conditional control statements and	l fun	ctio	ns.	
3			various file operations and analy				Ising
C		s library.					88
4	-		oose the various widgets to desi	on	and	dev	elon
·		ical User Interface (GU	e	8	unu	ue ,	Crop
List of Ex	.	,					
1	Week						
-			illustrate data types (int, char, float	t, str	ing)		
		10 1	to perform the following expression		0,		
		perator precedence				Ð	
		1) 5+3*2					
	`	2) 2*3**2					
	`	3) 2**3**2					
	```	4) (2**3)**2					
	`	, , ,	to illustrate type conversion functi	ons			
			n to illustrate pi, sqrt, cos, sin fu		ons	of n	nath
		nodule					
2	Week	-2:					
	1. V	Vrite a program to calcu	late simple interest				
			to calculate compound interest				
		1. 1.0	to print ASCII value of a character	r			
			to find the area of a circle				
			r the given number is prime or not				
	6. V	Vrite a python program	to find the area of a triangle				
	7. V	Vrite a program to perfo	orm string concatenation				
3	Week						
	Illustra	ate Numpy operations.					
	1.	Program to read, proce	ess and display data				
	2.	Program to access data	a using various numpy functions of	n 1D	arr	ays.	
	3.	-	functions of Numpy on 2D arrays				
4	Week	<b>-4:</b>					
		Write a python program numbers.	n to display minimum and maximu	m ai	non	g th	ree
			n to count the number of even a	nd c	hh	ոստ	here
		from a series of number		iiu (	uu		0015
				itoro	tion	and	
		write a python program recursion.	to display Fibonacci series using	nera	uon	and	L
			m to find the factorial of a muni-	<b>.</b>		h c	nd
		write a python program without recursion.	m to find the factorial of a num	Jer	w1t	па	пu
		without recursion.					

5	Week – 5:
	1. Write a python program to find sum of elements in a list recursively
	2. Write a python program to determine number of times a given
	letteroccurs in a string using recursion
	3. Write a python program to find if a number is prime or not a prime using
	recursion
	4. Write a python program to find the product of two numbers using
	recursion.
	5. Write a python program find the power of a number using recursion.
6	Week – 6:
	1. Write a python program to find the largest and smallest number in a list.
	2. Write a python program to merge two lists and sort it.
	3. Write a python program to remove the duplicate items from a list.
	4. Write a python program to check if a string is a palindrome or not.
	5. Write a program to replace all the occurrences of a with x in a string.
7	Week – 7:
	1. Write a program to create a list of tuples with the first element as the
	number and the second element as the square of the number.
	2. Write a python program that takes the list of tuples and sorts the list of
	tuples in increasing order by the last element in each tuple.
	3. Write a python program to add a key value pair to a dictionary and
	update the dictionary based on the key.
8	Week – 8:
	1. Illustrate in operator and write a python program to count number of
	lowercase characters in a string.
	2. Illustrate the following functions of list 1)len 2)extend 3)sort
	4) append 5)insert 6)remove
	3. Program to pass list as an argument to function illustrate with example
	4. Illustrate the following methods of dictionary with examples
	1) keys() 2) values() 3) items() 4) pop() 5) delete()
	5. Write a Program to do a reverse dictionary lookup in python.
9	Week – 9:
	1. Write a program to generate 20 random numbers in the range of 1 to100
	and write to a file
	2. Program to Illustrate seek(), tell() and flush() methods with different
	arguments.
	3. Program to Illustrate read, readline and readlines methods.
10	Week – 10:
	1. Program to illustrate how to import data from CSV to DataFrame using
	Pandas.
	2. Program to illustrate how to Inspect data in DataFrame using head(),tail ()
	and describe() functions.
11	3. Program to perform sorting and slicing operations.
11	Week – 11:
	1. Program to design an application to display –Hello World.
	2. Program to design an application using Label, Entry and Button widgets.
	3. Program to design an application using Tkinter Geometry methods pack(),
	grid(), place() methods.
	4. Program to design an application using CheckButton and Radiobutton widgets.

12	Week – 12:	
	1. Program to design an application using Menu and Menubutton widgets.	
	2. Program to design an application using Listbox and Scrollbar widgets.	
	3. Program to design an application using Messagebox and File Dialog	
	widget	
Demonstration experiments		
1	Demonstration of Python IDLE to implement solutions.	
2	Demonstration on Colab notebook to read, access and display data from google	
	drive.	
3	Demonstration on jupyter notebook to link and access data.
